The rocket can be used individually, as a favicon, chatbot profile picture, etc.

Do not distort the icon or change the color outside of our brandbook.

Partner Logos

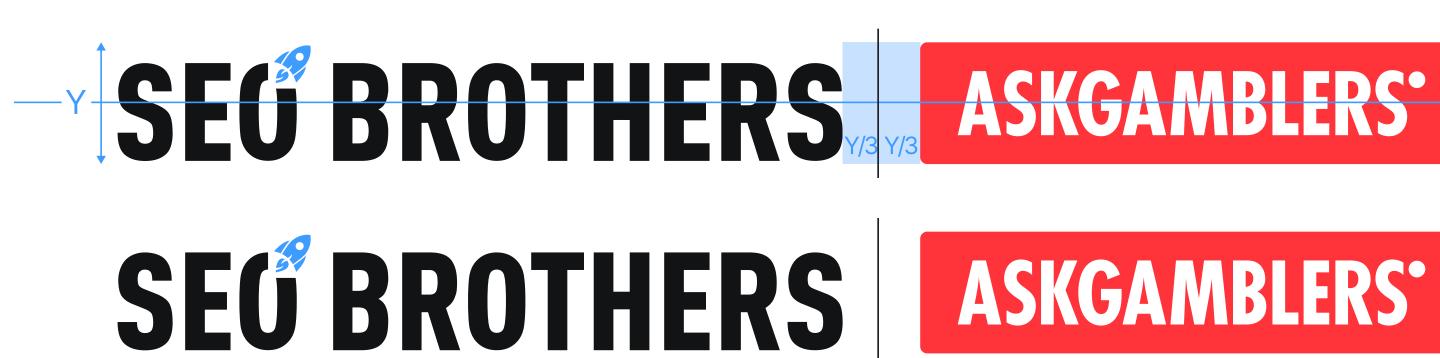

Size relationship – Primary Logotype

When partner logos are longer and more text-based, we prefer them to be at the same height as the logotype. For symbol-based logos, we prefer them to be 2X the height of the logotype.

Size relationship – Alternate Logotype

When partner logos are longer and more text-based, we prefer them to be at between 30 and 50% the height of the stroke. For symbol-based logos, we prefer them to be the same height as the logotype.
